

My name is Matheus, I'm 28 years old and I'm currently living in Porto.

In the last three years, I've been working as a web/software developer, using technologies such as React, Vue/Nuxt, SASS, Drupal, PHP/Laravel, and others. I have also gained experience with the agile methodology, which has allowed me to improve my teamwork skills and consistently deliver high-quality tasks.

Currently, I am single, and I have come to Porto to pursue a master's degree in software engineering. I believe this is aligned with my career goals and will complement my professional skills, preparing me for future challenges in the field.

I am excited about the possibility of joining your team. I consider myself proactive and hard-working and I am always looking to enhance my understanding of technology. In fact, I never stop learning and I am always looking to acquire new knowledge that can help me provide better user experiences and simplify my work. I believe I would add great value to any company, and I never give up when faced with a problem.
